- Contributing to a lot of competitions related to the explained topics.
- Gaining a lot of skills and experience from international institutions collaborating with the bank in this internship like SAS, LinkedIn, and Frankfurt School.
- Getting a lot of certificates at the end of this internship.

Projects

Open Online Multilingual Encyclopedia |(Grade: A+)   **May 2024 - June 2024**

- **Tools: HTML, CSS JavaScript, Bootstrap, React.js, PHP, MYSQL, SCSS**
- **Idea:** The application is a multilingual open online encyclopedia written and maintained by a community of volunteers through a model of open collaboration, using an editing system. Individual contributors, also called editors, use the application that allows them to create and collaboratively edit pages or entries via a web browser. The app also allows its users to bookmark articles and organize them into lists. Users can also share these lists across different devices. The lists can be sorted, searched, and reorganized offline. The app allows users to customize their Explore feed and choose the items they prefer to see in this section. The application provides users with the option to view their previously searched articles in History (which can save a lot of time in case they forget to bookmark what they were previously reading).
